

Framingham Heart Study (FHS) dbGaP Acknowledgment Statements **Revised on 6/1/2014**

Your acknowledgment of the FHS data should **always** include the FHS contract (component I below) **AND** any relevant dataset(s) listed under component II below.

In addition, if any FHS phenotypic dataset(s) used in your analysis were derived from non-contract supported studies, these dataset(s) should also be acknowledged (component III below).

Components of the FHS dbGaP Acknowledgment Statements:

I. Framingham Heart Study (FHS) Contract Acknowledgment (Use the following statement for **ALL** analyses resulting from FHS dbGaP data).

"The Framingham Heart Study is conducted and supported by the National Heart, Lung, and Blood Institute (NHLBI) in collaboration with Boston University (Contract No. N01-HC-25195). This manuscript was not prepared in collaboration with investigators of the Framingham Heart Study and does not necessarily reflect the opinions or views of the Framingham Heart Study, Boston University, or NHLBI."

II. Genotypic, Genomic, Proteomic, Metabolomic and/or Molecular-Phenotypic Dataset Acknowledgment (Use one or more of the following statements relevant to the specific datasets used in your analysis)

A. Framingham SNP Health Association Resource (SHARe):

"Funding for SHARe Affymetrix genotyping was provided by NHLBI Contract N02-HL-64278. SHARe Illumina genotyping was provided under an agreement between Illumina and Boston University."

B. Candidate gene Association Resource (CARE): "Funding for CARE genotyping was provided by NHLBI Contract N01-HC-65226."

C. Systems Approach to Biomarker Research (SABRe): "Additional funding for SABRe was provided by Division of Intramural Research, NHLBI, and Center for Population Studies, NHLBI."

D. NHLBI Framingham Heart Study Allelic Spectrum Project: "The sequence data production for this project was funded by National Human Genome Research Institute (NHGRI) grant U54 HG003067."

E. NHLBI GO-ESP: Heart Cohorts Exome Sequencing Project (FHS): "This study is part of the NHLBI Grand Opportunity Exome Sequencing Project (GO-ESP). Funding for GO-ESP was provided by NHLBI grants RC2 HL103010 (HeartGO), RC2 HL102923 (LungGO) and RC2 HL102924 (WHISP). The exome sequencing was performed through NHLBI grants RC2 HL102925 (BroadGO) and RC2 HL102926 (SeattleGO).

HeartGO gratefully acknowledges the following groups and individuals who provided biological samples or data for this study. DNA samples and phenotypic data were obtained from the following studies supported by the NHLBI: the Atherosclerosis Risk in Communities (ARIC) study, the Coronary Artery Risk Development in Young Adults (CARDIA) study, Cardiovascular Health Study (CHS), the Framingham Heart Study (FHS), the Jackson Heart Study (JHS) and the Multi-Ethnic Study of Atherosclerosis (MESA)."

F. Building on GWAS for NHLBI-diseases: the U.S. CHARGE consortium (CHARGE-S): FHS: "This study is part of the Building on GWAS for NHLBI-diseases: the U.S. CHARGE consortium (CHARGE-S). Funding for CHARGE-S was provided by NHLBI grant 5RC2HL102419 through the American Recovery and Reinvestment Act of 2009 (ARRA). Data for the Building on GWAS for NHLBI-diseases: the U.S. CHARGE consortium was provided by Eric Boerwinkle on behalf of the Atherosclerosis Risk in Communities (ARIC) Study, L. Adrienne Cupples, principal investigator for the Framingham Heart Study, and Bruce Psaty, principal investigator for the Cardiovascular Health Study. A portion of this research was conducted using the Linux Cluster for Genetic Analysis (LinGA-II) funded by the Robert Dawson Evans Endowment of the Department of Medicine at Boston University School of Medicine and Boston Medical Center. The CHARGE-S investigators request that publications resulting from these data cite their original publication: Psaty BM, O'Donnell CJ, Gudnason V, Lunetta KL, Folsom AR, Rotter JI, Uitterlinden AG, Harris TB, Witteman JC, Boerwinkle E; CHARGE Consortium. Cohorts for Heart and Aging Research in Genomic Epidemiology (CHARGE) Consortium: Design of prospective meta-analyses of genome-wide association studies from five cohorts. *Circ Cardiovasc Genet* 2: 73-80, 2009."

III. Non-Contract Phenotypic Dataset Acknowledgment (Select from the following statements those relevant to the specific datasets used in your analysis)
