

Studies	Study design	Finding	Methodological limitations	Relevance	Coherence	Adequacy	Confidence
<b>Content</b>							
1 (Jackson 2010)	Semi-structured interviews and questionnaires	Some parents felt that the information in the decision aid was presented in a balanced way that reported both the potential benefits and harms	Very serious <sup>1</sup>	High	High	Low <sup>2</sup>	Very low
<b>Decision making</b>							
1 (Jackson 2010)	Semi-structured interviews and questionnaires	Most of the parents interviewed felt that the decision aid helped them make an informed choice on MMR vaccination and reduced their need to ask further questions to healthcare practitioners	Very serious <sup>1</sup>	High	High	Low <sup>2</sup>	Very low
1. Finding was downgraded twice because it was identified in a study at high risk of bias							

Studies	Study design	Finding	Methodological limitations	Relevance	Coherence	Adequacy	Confidence
2. Finding was downgraded twice for adequacy because it was supported by a single study that was not particularly detailed or rich in the results that fed into this finding
